The following is an Examiner's Statement of Reasons for Allowance: The Prior Art of Record is replete with examples of protective elements having combined surge arresters and varistors, i.e. Tanaka et al. (5,559,663) and Boy et al. (5,383,085). However, the Prior Art of Record does not disclose the specific structural interrelationships between the components as found in the claimed combination of Independent Claim 1; nor is there any strong motivation for modifying the Prior Art of Record so as to meet the claimed combination. Therefore, it is the opinion of the Examiner that the claims are novel and unobvious in view of the Prior Art of Record. It is also the opinion of the Examiner that Dependent Claims 13 and 14 are definite and merely place the protective element within environments, which are well known applications for such protective elements of the type, and therefore, are not subject to application of MPEP 2173.05(q), "Use" Claims. Independent Claim 1 stands on its own and Dependent Claims 2-14 are allowable due to their dependency from Claim 1.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
